# ABSTRACT

This abstract provides an overview of Career Guidance a web application which builds a career by providing tips and advice for university or college students. The project is designed to create an Online based guidance tool that would help students explore and make decisions about their career paths.

## INTRODUCTION

Career Guidance System using Machine Learning is developed for Engineering Graduates who have completed their final year (Computer Science), who are confused regarding which field/path to choose for their career.

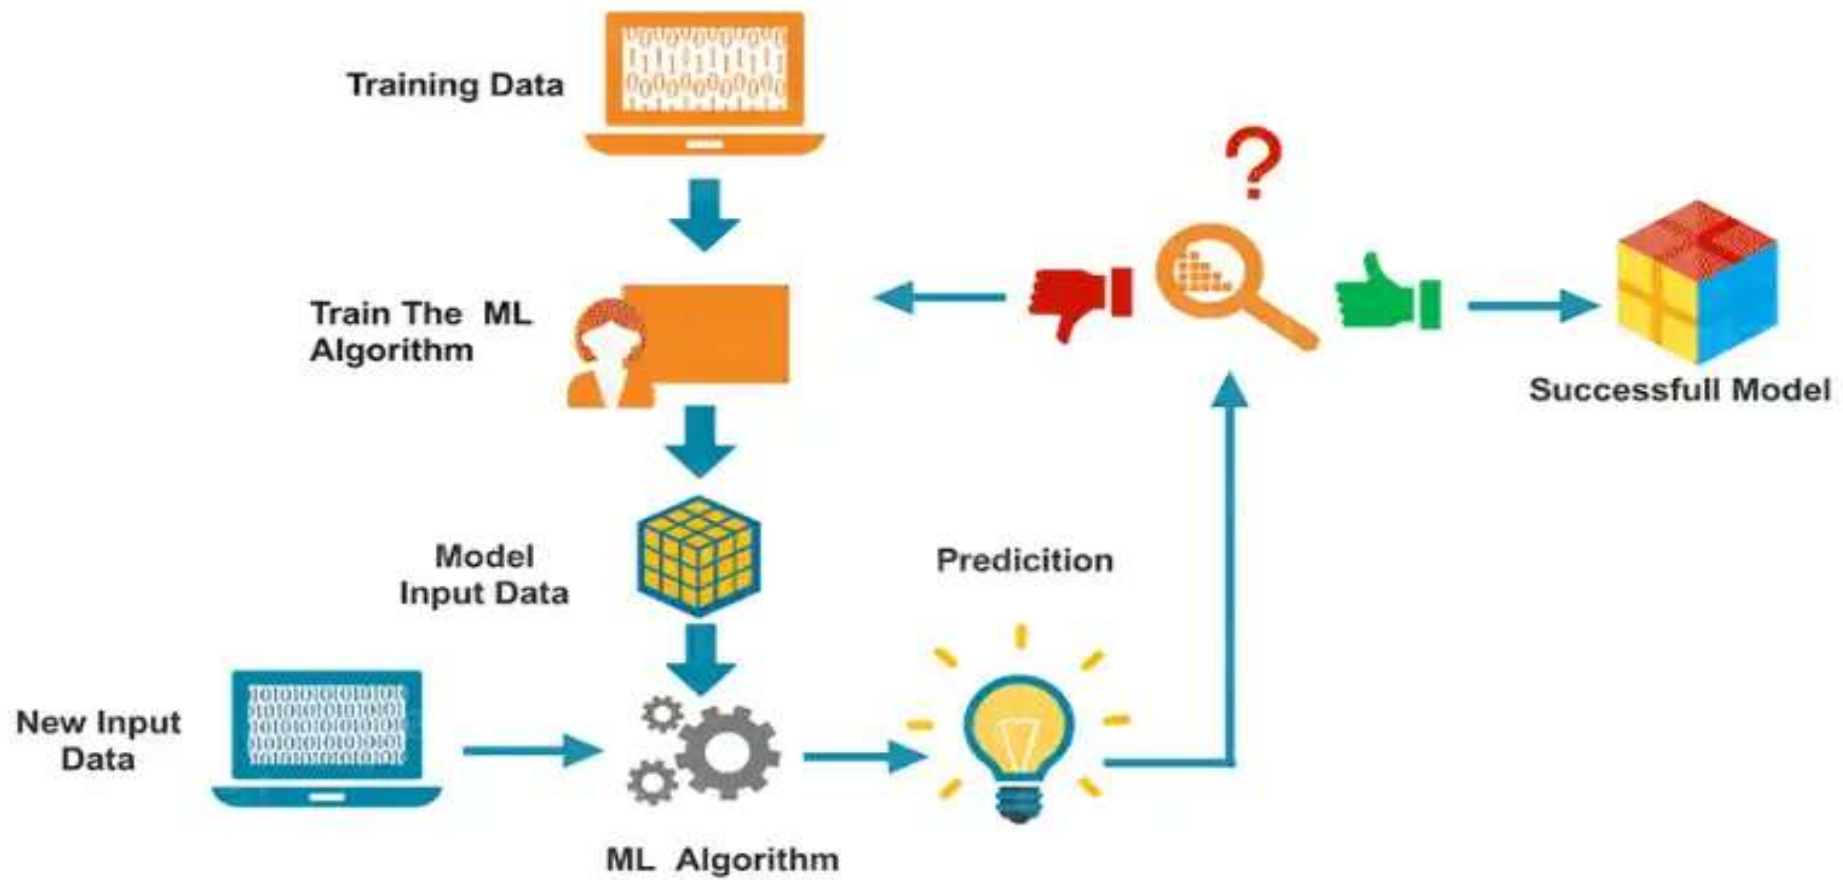

As there are already many options available to choose Careers , still taking the correct decision is a challenge.

So we have considered all the aspects which are important to choose a Career, aspects considered in our project are selecting the categories based on their interests and submit that page

“ *To overcome this, We are developing a website by using machine learning Technology.*

# WORKING OF MACHINE LEARNING

## EXISTING SYSTEM

There is no unified Online Career Guidance System for career guidance. Students generally have to go through hundreds of websites sites to choose correct career path.

In the absence of adult guidance, they often find it difficult to find relevant information about the career they want. Generally students make poorly researched decisions which they then have to struggle with.

# EXISTING SYSTEM ARCHITECTURE

Website

Selects Type of career path

Performs guidance

Exits from the website

# DRAWBACKS

- Less career options
- User needs to visit each and every website individually
- User may not be aware of different career paths that are currently available .

## PROPOSED SYSTEM

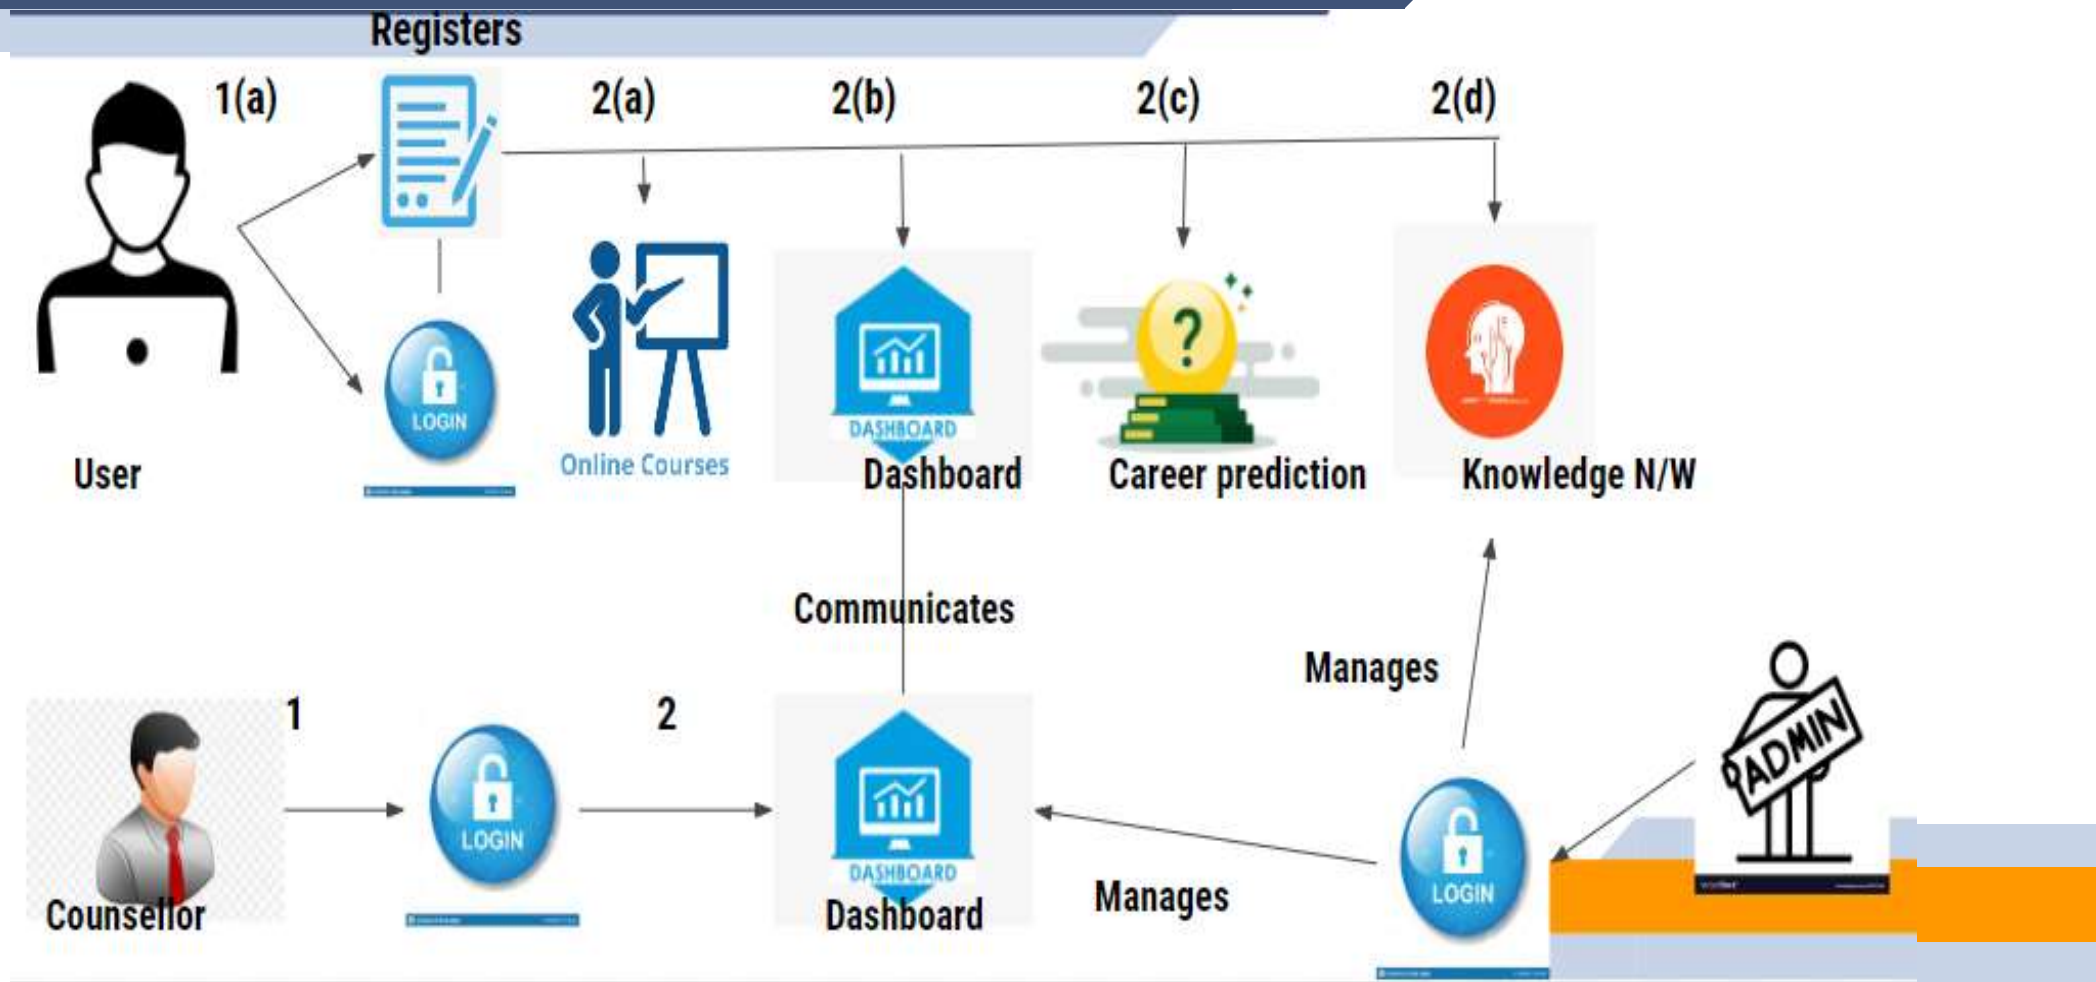

- The Career Guidance System begins with choosing a career. Students will be able to view various career choices like courses available for them , Knowledge Network (Trending technologies are listed along with some information ) , there is a career prediction module that provides certain categories to rate themselves to get right career path

## PROPOSED SYSTEM

- A Counsellor module also involved where students can ask their doubts and get rectified through one to one chat .
- There are some set of categories provided in student dashboard module (my career) , for every category there will be a counsellor to clear the students doubts and guide them . All this information will help future college students to make a well informed choice.

# PROPOSED SYSTEM ARCHITECTURE

# ADVANTAGES

- Student and counsellor can maintain 1:1 communication
- Many career options are provided with in single platform.
- Gives accurate information.

## MODULES

- **Student.**(Person who wants to know his career path)
- **Counsellor.**(Person who interacts with student to clear his/her doubts)
- **Admin.**(Person who manages both student and counsellor accounts )

## SOFTWARE REQUIREMENTS

# HARDWARE REQUIREMENTS

Mobile

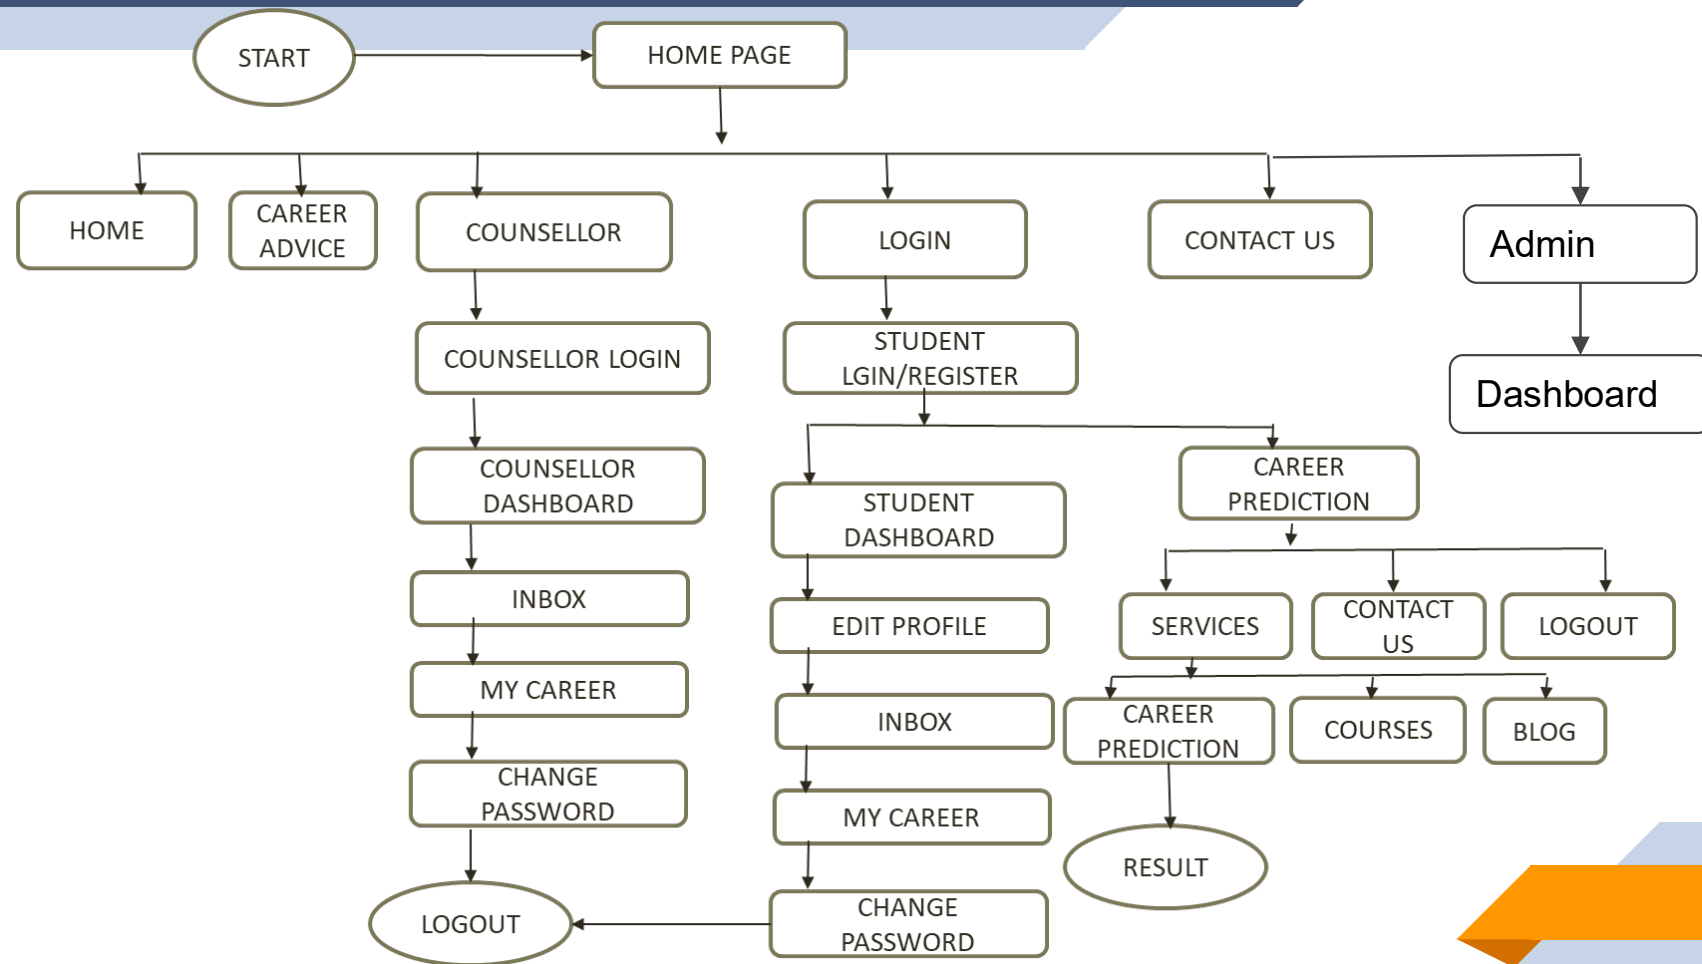

Laptop

The background features a large, dark blue chevron shape pointing to the right, which is layered over a light blue background. Below the blue shapes, there is a solid orange horizontal bar. The overall design is modern and minimalist.

# *DATAFLOW DIAGRAM*

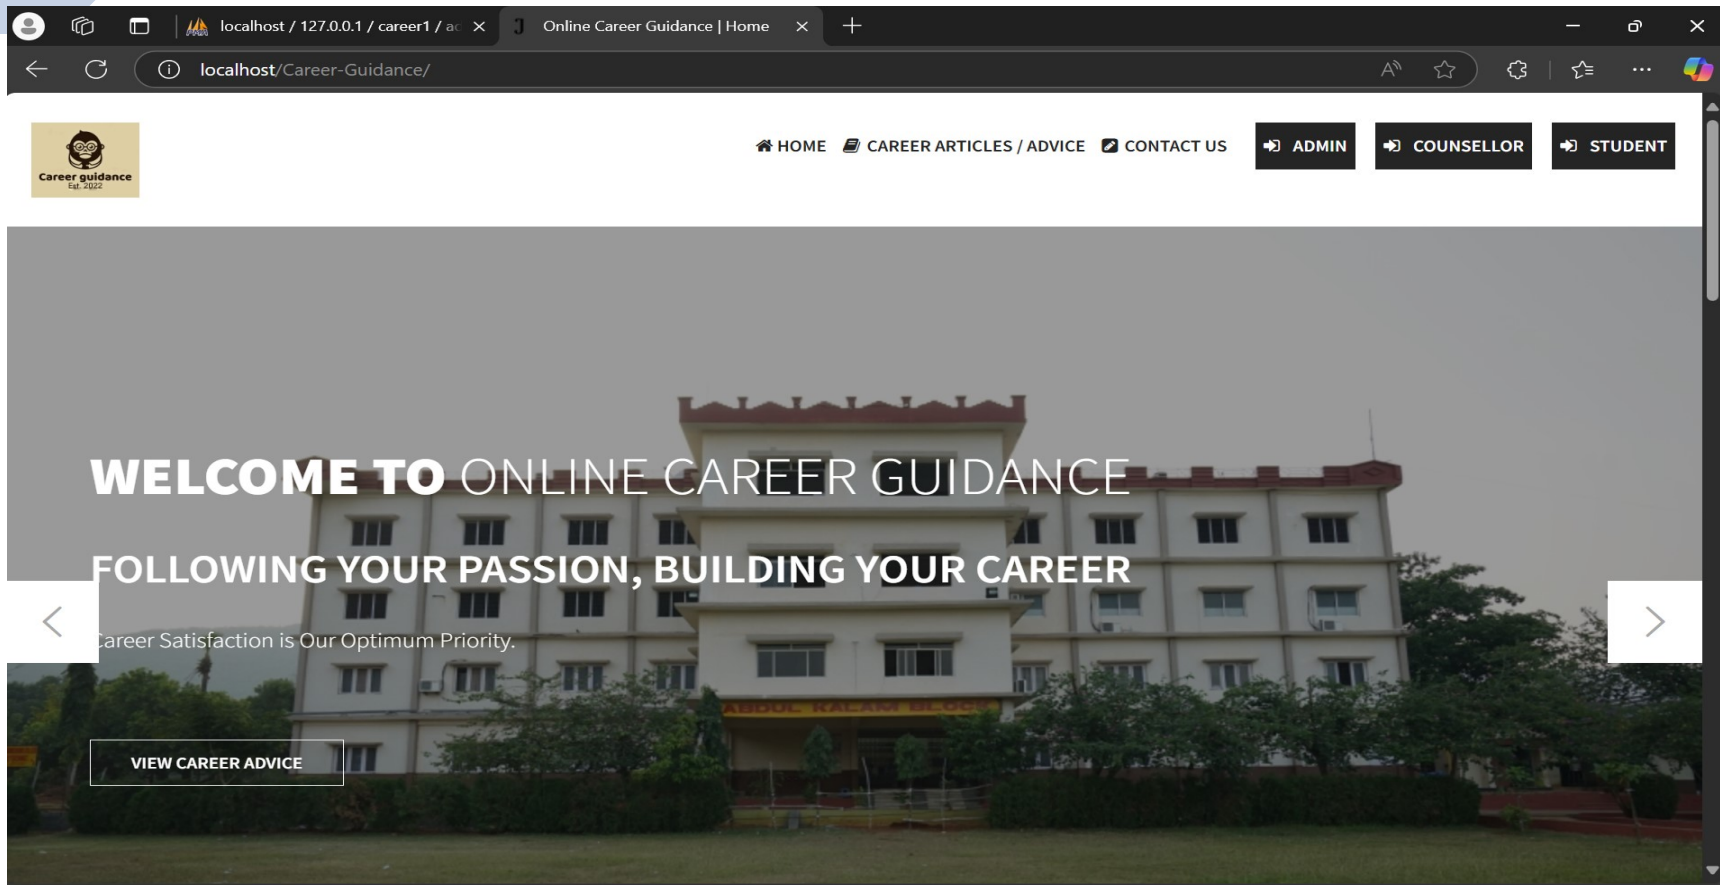

# DATA FLOW DIAGRAM

The background features a large, dark blue parallelogram pointing to the right, which contains the text. Above and below this shape are lighter blue geometric bands. At the bottom right, there is a horizontal orange bar with a 3D effect.

# *OUTPUT SCREENS*

## Home Page

## Registration Page

The screenshot shows a web browser window with the address bar displaying `localhost/Career-Guidance/register.php`. The website has a navigation bar with a logo on the left and links for HOME, CAREER ARTICLES / ADVICE, CONTACT US, ADMIN, COUNSELLOR, and STUDENT. The main content area has a dark header with the title "Registration Page" and a breadcrumb "Home / Registration Page". Below this, the heading "Let's Get Started" is centered. The registration form consists of six input fields arranged in three rows and two columns: First Name, Last Name, Username, Email, Password, and Confirm Password. Each field contains a placeholder text.

# Student Inbox

The screenshot shows a web application interface for a student's inbox. The browser address bar indicates the URL is `localhost/Career-Guidance/inbox.php`. The page header includes a logo for 'Career guidance Est. 2022' and navigation links: HOME, CAREER PREDICTION, CAREER ARTICLES / ADVICE, and CONTACT US. A user profile for 'RATAN' is also visible.

The main content area is titled 'My Dashboard' and includes a sidebar menu with the following options: Dashboard, Edit Profile, **Inbox** (highlighted), My Career, Career Articles, Change Password, and Logout.

The 'My Messages' section displays a table with the following data:

S/N	Message Category	Conversations	Date
1	Java	<a href="#">View Conversation</a>	Sat-11-2024 at 10:28 PM
2	Python Programming	<a href="#">View Conversation</a>	Fri-05-2022 at 07:30 AM
3	General	<a href="#">View Conversation</a>	Mon-05-2022 at 08:16 PM

The Windows taskbar at the bottom shows the system time as 3:51 PM on 11/23/2024, along with various application icons and a weather widget indicating 40°.

Career Guidance

## FUTURE ENHANCEMENT

Career Guidance in the Present and Future Taking a page from India's successful educational system. Since we only developed our system for one specific branch (IT), we can expand it by including other branches as well. We can maintain more than one counsellor for a single category .

When all the counselors are busy an alert message will be sent to the student.

## CONCLUSION

The paper proposes a career steering gadget which uses Machine learning for Prediction. it is handiest and efficient web application, with a view to be used by any Engineering Student of CS/IT(presently in final year or completed graduation) to assess their talent, abilities and which particular profession direction to pick out from numerous Career paths available.

# THANK YOU
